

### **Discussion Rubric: Capstone (Graduate)**

Your active participation in the discussion forums is important to your overall success this term. Discussion questions are designed as structured opportunities to help you engage, problem-solve, and reflect with your peers as related to the course's final project. In the capstone experience, you are encouraged to take initiative and use the discussion boards for collaborative problem-solving and navigating the demands of the final project while soliciting and giving feedback to your peers.

These discussions offer you the opportunity to express your own thoughts, ask questions for clarification, and gain insight from your classmates' responses and instructor's guidance.

While a designated number of response posts are not required, it is still important that you engage with your peers to help replicate the type of peer collaboration and problem-solving often necessary to succeed in a professional environment.
