

IT 665 Module Three Assignment Guidelines and Rubric

Overview: In this assignment, you will have the opportunity to explore the AdventureWorks database and familiarize yourself with the configuration. This is an important step before making recommendations for expanding their database to meet the organization's needs.

Prompt: Explore the structure of the tables in the AdventureWorks database. Using the provided [worksheet](#), list the tables included in the database(e.g., customer table, employee table, product table). For each table, list the fields in the second column.

Note: You will be referring to this table in order to complete your Module Four discussion, and as a tool for your final project.

Rubric

Guidelines for Submission: Complete the worksheet provided and submit it in Brightspace.

Critical Elements	Proficient (100%)	Needs Improvement (70%)	Not Evident (0%)	Value
Tables	Lists all tables included in the AdventureWorks database	Lists only some tables included in the AdventureWorks database	Does not list the tables included in the AdventureWorks database	50
Fields	Lists all of the fields for each table in the AdventureWorks database	Lists only some of the fields for each table, or only lists fields for some of the tables	Does not list the fields for each table in the AdventureWorks database	50
Total				100%
