

PSY 636 Milestone Three Guidelines and Rubric: Intervention Strategies

Prompt: Recommend at least three effective and appropriate treatment options available for both family therapy treatment and individual treatment for various behavioral/psychological challenges affecting children and adolescents specifically applicable to your intervention plan. The treatment options chosen should be substantiated by scholarly research. Provide a list of at least six references from established books or peer-reviewed journals that will be used to support chosen treatment options outlining their likely effectiveness. It is important to note that a successful analysis and interpretation of the works will use a minimum of six secondary sources composed of a combination of scholarly journal articles relevant to the topic. While the quantity of resources is not what ensures a successful treatment plan, it is necessary in order to provide you a solid research foundation for your treatment plan.

Format: The assignment should follow these formatting guidelines: use of six sources, 3–4 pages, double spacing, 12-point Times New Roman font, one-inch margins, and citations in APA format.

| Critical Elements | Exemplary (100%) | Proficient (90%) | Needs Improvement (70%) | Not Evident (0%) | Value |
|--|---|---|---|--|-------|
| Intervention Strategies: Family Therapy | Meets “Proficient” criteria and provides insightful rationale substantiated by scholarly research | Recommends at least three effective and appropriate treatment options available for family therapy treatment for various behavioral/psychological challenges affecting children and adolescents | Recommends one or two effective and appropriate treatment options available for family therapy treatment for various behavioral/psychological challenges affecting children and adolescents | Does not recommend effective and appropriate treatment options available for family therapy treatment for various behavioral/psychological challenges affecting children and adolescents | 30 |
| Intervention Strategies: Individual Treatment | Meets “Proficient” criteria and provides insightful rationale substantiated by scholarly research | Recommends at least three effective and appropriate treatment options available for individual treatment for various behavioral/psychological challenges affecting children and adolescents | Recommends one or two effective and appropriate treatment options available for individual treatment for various behavioral/psychological challenges affecting children and adolescents | Does not recommend effective and appropriate treatment options available for individual treatment for various behavioral/psychological challenges affecting children and adolescents | 30 |
| Sources | Incorporates at least six established books, peer-reviewed scholarly articles, or journals related to treatment options | Incorporates at least five established books, peer-reviewed scholarly articles, or journals related to treatment options | Incorporates three to four established books, peer-reviewed scholarly articles, or journals related to treatment options | Does not incorporate appropriate scholarly resources to reflect the depth and breadth of the research on the topic of treatment options, or includes less than three resources | 20 |
